Moscow State Institute of Electronics and Mathematics (Technical University), Moscow – *Specialist's Degree/Systems Engineer*

September 2003 – September 2008

Projects

Discount service for MTS Russia

Participated as FrontEnd Developer. Markup from PSD to HTML (desktop + mobile), setup project builder, programming logic with AngularJS

Dating services for MTS RB, Life :) RB, Velcom (Vmeste!) – SPA

Participated as FrontEnd Developer. Markup for mobile devices from PSD to HTML, setup project builder, programming logic with AngularJS

Music service for TELE2 KZ – SPA – http://muz.tele2.kz/app/

Participated as FrontEnd Developer. Markup for mobile devices from PSD to HTML, setup project builder, programming logic with AngularJS

Social Network "Rodovoe Derevo" –
http://rodovoederevo.ru/

As part of the developers team for that project I've prepared web layouts using HTML and CSS, integrated html layouts with PHP backend.

Generator Basic Page –
https://github.com/chekit/generator-basic-page

My own boilerplate project to create web pages with Pug, Scss and TypeScript and task manager Gulp. This project helps to jump on right on coding without needing to setup dev environment.

This boilerplate was used to markup and code logic for this projects:

Landing page for HR Agency "Variant" – http://variant-hr.ru/

Pages for "Znak Kachestva" – http://znakachestva.ru/

Promo pages for "Open Air Sale" – http://www.spletnik.ru/vremenagoda
